## **DETAILED ACTION**

## Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group 1, claim(s) 1-13, those of which are drawn to compounds, compositions, processes and methods of Formula I wherein Az is triazole, Ar is thienyl, R1 is triazole and A is not het.

Group 2, claim(s) 1-13, those of which are drawn to compounds, compositions, processes and methods of Formula I wherein Az is triazole, Ar is thienyl, R1 is tetrazole and A is not het.

Group 3, claim(s) 1-13, those of which are drawn to compounds, compositions, processes and methods of Formula I wherein Az is triazole, Ar is thienyl, R1 is diazole and A is not het.

Group 4, claim(s) 1-13, those of which are drawn to compounds, compositions, processes and methods of Formula I wherein Az is triazole, Ar is thienyl, R1 is tricyclictriazole and A is not het.

Groups 5-8 represent the same definition as in Groups 1-4 above, except now Ar is pyridyl, respectively.

Groups 9-16 represent the same definition as in Groups 1-8 above, except now Az is a het group other than triazole.

Groups 16-20 represent the same definitions as in groups 1-4 above, except now Ar is a het other that thienyl or pyridyl.

Groups 21-40 represent the same definition as in Groups 1-20 above, except now A is het.

Group 41 represent compounds, compositions, processes and methods not covered by any of the above groups.

The inventions listed as Groups 1-41 do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: \*\*\*

They do not meet the criteria forth Markush group because the core is not a substantial portion of the molecule, neither is said core a novel feature over the prior art.

This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

Furans, triazoles, thienyls, pyridyls, tetrazoles, diazoles, etc.

Applicant is required, in reply to this action, to elect a single species which falls under one of the above elected groups and to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Application/Control Number: 10/511,049

Art Unit: 1626

The following claim(s) are generic: Claim 1, for example.

The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons:

Same as above.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim

Art Unit: 1626

remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Deborah C. Lambkin whose telephone number is 571-272-0698. The examiner can normally be reached on 9.00-5.30 M-F.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Joseph McKane can be reached on 571-272-0699. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
